Information Systems Fresh Graduate and Software Engineer with comprehensive internship experience in developing and modernizing high-impact web applications. Proficient in Full-stack development utilizing the Laravel and React ecosystems. Demonstrated a proven track record in digitalizing manual business workflows into efficient systems, and optimizing web performance through modern techniques such as lazy loading and responsive design. Adept at bridging technical requirements with business goals through effective stakeholder communication, ensuring the delivery of scalable and user-centric digital solutions.

Singaperbangsa Karawang University | Karawang, Indonesia

Bachelor's Degree of Information System (Aug 2022 – Present)

- GPA: 3.92 / 4.0
- Relevant Courses: Web-based Programming, Object-Oriented Programming, Programming Algorithms, Software Engineering, Information Systems Design Analysis, Advanced Database, Data Structure Algorithms

Experiences

PT Advics Manufacturing Indonesia | Software Engineer (Website)

Internship (Aug 2025 – Feb 2026)

- Engineered high-impact web applications and modernized legacy systems by adding advanced features and rebuilding existing architectures to successfully digitalize manual operational processes, utilizing Laravel, MySQL, and PostgreSQL.
- Optimized system performance and user interfaces by implementing lazy loading for efficient large-dataset fetching and ensuring fully responsive designs across devices, utilizing React, Tailwind CSS, and GitHub for version control.
- Streamlined the software development lifecycle by facilitating direct requirement-gathering meetings with end-users, effectively translating business needs into technical solutions and presenting regular progress updates.

Vocasia | Frontend Website Developer

Internship (Jan 2025 – Jun 2025)

- Engineered responsive and interactive frontend components by precisely slicing UI/UX designs, ensuring cross-browser compatibility and seamless user experience.
- Collaborated effectively within a cross-functional team alongside UI/UX designers to deliver visually appealing, user-centric web layouts while meeting strict project deadlines.
- Developed and maintained robust frontend features utilizing Next.js, TypeScript, and Chakra UI, significantly improving website performance and maintainability.

Hacktiv8 | ReactJS for Frontend Web Developer

Participants (Sep 2024 – Dec 2024)

- Completed 35 learning materials covering HTML, CSS, ReactJS, Testing, Web Storage, and Deployment; completed 21 quizzes related to web development; and completed 6 assignments with a perfect score (100) on all assignments.
- Completed an E-Commerce themed Capstone Project with a login feature whose credentials are customized with the provided API, Add to Cart feature, and Checkout feature. The project was built using ReactJS, TailwindCSS, Flowbite Tailwind, Redux, and Web Storage.
- Completed the program with final score 97,5 and managed to get a certificate of completion and get a score of 95 on the final project.

Sanbercode | ReactJS Web Frontend Bootcamp

Participants (Jan 2024 – Feb 2024)

- Worked on 12 mini projects, 1 final project and 3 quizzes and attended 1 month of meetings with a total of 15 learning hours and learned a total of 24 materials such as git, es6, tailwind, components & props, routes, rest api with axios, hooks, state authentication, authorization, flowbite tailwind, deployment using netlify.
- Creating a job seeker frontend application called CareerSync using react js, tailwind and flowbite which has Create, Read, Update, Delete features.
- Received an award as the best participant out of 50 participants with a final project score of 97 and also the most active participant in batch 53.
